CROP CONDITIONS DELIGHT WINCHELL,

Vice President of Frisco Enthusiastic Over Grain Prospects in Southwest.

TONNAGE WILL BE ENORMOUS.

Grain Elevators Being Erected in Many Oklahoma Towns and Previous Record Will Be Broken.

Among those who do not view the crop prospect of the Southwest with a pessi-mistic eye is B. I. Winchell, vice president and general manager of the Frisco, who returned yesterday from a trip over the Okia-homa and Southwestern lines of that sys-

"It would do the heart of the pessimist good," said Mr. Winchell, "to take a trip through Oklahoma and the Southwest and see the contented conditions that exist as a result of the enormous and high-grade grain crops.

The citizens of the Southwest are not worrying over Wall street rumors, and the depression in the stock market is not caus-ing them any anxiety. They are too busy harvesting and shipping their grain.
"Take for example Oklahoma. Early in

the season it was thought that the wheat crop would equal the banner crop of this Territory, which was in the neighborhood of 25,000,000 bushels, but as the season advanced it became evident that the crop would amount to at least 30,000,000 bushels, and now it is thought it will touch the 50,000,000 bushel mark.

"As a result, almost in every town in the Territory there are from three to four elevators being built-small elevators, it true, but in the aggregate capable of storing an enormous amount of grain.

On our little line, the Blackweil, Enid and Southwestern, we are shipping forty cars of grain a day, which is recommend at this early date, and, furthermore, most of this grain is good second-grade grain.

Though we have ordered and received a large amount of rolling stock it seems that we will have more grain than we can handle, for even now all our cars and motive power are in use.

While the indiant Territory has not as large a grain crop as its more densely populated sister Territory, still I believe it will more than surpasse its previous record in hay, corn and cotton.

The condition of the grass is especially fine in the indian Territory, and promises a tremendous hay tonnings for the roads extending into it.

Texas, with other Southwestern States, promises to outdo herself this year in the matter of grants crop prediction, and I camed see any reason who add of the Southwestern seems. "On our little line, the Blackwell, Enld

promises to outdo herself this year in the matter of a large crop prediction, and I cannot see any reason why all of the Southwest lines should not be more than satisfied with the crop conditions the year.

"Speaking for the Friece, I can say that its properts were never so bright as new. The extensions we are building are being pushed as rapidly as possible, and will lead our lines into a territory as rich as that we now occupy, besides giving us valuable and desirable connections."

GOULD PLEASED WITH EXTENSIONS. Financier Views Work Done by Wabash at Pittsburg.

It is stated that George Gould is not only delighted, but surprised, at the possibili-ties of the Wabash extensions into Pittsburg, and took frequent occasion to so express himself while on his recent trip to

burg, and took frequent occasion to so express himself while on his recent trip to that city.

It is said that, Mr. Gould had, never seen the work being done by the Wahash at this point, and freely admitted that he had never before realized the importance and possibilities of a road into the "Smoky City" as he had any actually viewing it.

Mr. Gould while on the trip frequently expressed his belief in the future of Enlimore as an export city, stating that in more than one way it presented superior facilities to New York, but especially in the matter of lighterage the advantages of Enlimore were far better.

In New York it is stated that it costs 60 cents a ton to get freight from the train to the ship, while in Enlimore the depth of the water is sufficient for the ship to get near enough to the wharf for the train to unload directly into it.

In regard to the West Virginia lines, Mr. Gould was also decidedly pleased. It is believed that the lines will be linked up and built in two years. Contracts have been let for the completion of the Cherry Run road, which will cost \$2,600,000, the contract having been divided between two contractors, one getting the contract for a portion of the line to cost about \$35,000 and McArthur Bros. & Co. getting the contract with another New York firm to complete the remainder of the road.

ALEXANDER ROBERTSON PROMOTED. Will Become Manager of the West Virginia Central.

On the 1st of next month Alexander Robertson, superintendent of the middle division of the Wabash, will assume the position of manager of the West Virginia Central and Pittsburg, with headquarters at Cumberland. Horace G. Clark superintendent of the

Missouri Pacific at Atchison, Kas., will suc-Missouri Pacific at Atchison, Kas., will succeed to the position made vacant by Mr. Robertson's promotion. Mr. Robertson's appointment has not been officially announced. He succeeds C. L. Bretz, whose resignation has been in the hands of the Gould officials for some time, but was not acted upon, it being hoped that Mr. Bretz could be induced to stay with the company, but, owing to other interests which demanded his entire attention, he was unable to accept the offers made him.

Mr. Robertson started his rallroad career as a brakeman in the Bast. He worked up until he became an assistant to a division until he became an assistant to a division superintendent on the Boston and Maine Railroad. W. A. Garrett, formerly superintendent of the middle division of the Wahash, saw Robertson in the East and watched his work and brought him West and gave him a place on the Wahash, with which road he has been about five years. Mr. Robertson was first at Bluffs, a small station, and then came to Decatur as yard-master. He was promoted to the place of trainmaster, and when Mr. Garrett left Mr. Robertson was made superintendent.
